1937 - 1938

Reed C. Rollins
Gray Herbarium
Cambridge, Mass.

Collect Stanleya on Hams Fork - type locality of S. viridiflora Nutt.

Haplopappus contractus Hall. -

Fort Bridger, Wyo. - rare - only 1 collection

Eastern Slope of Big Pack mt. - west of Aggery Draw On Eocene, Green River Shale - Atriplex - Tetradymia desert. -

Wyoming

1610 Arabis -
limestone outcropping near City spgs. - 2 mi east of Laramie, albany Co., June 8, 1937 - 7,800 ft.

1611 Wesquerella - as 1610 montana (Gray) Wats.

1612 Wesquerella - as 1610 argentea (punsh) Macm.

1613 Draba - as 1610

1614 Arabis lignifera A. Nels.
Rocky hillside near Lyman, Uinta Co., 6,500 ft
Flr pinkish, small - plants usually branched near base but often simple, pubescence fine & branched - plants in open dwarfed those among sagebrush larger & more succulent. - pods pendulous - not strictly reflexed. June 10th

1615 Penstemon radicosus A. Nels.
Stem several as 1614 -

1616 Descurainia - as 1614 andreanum (Abell) Payson
Sandy soil among the sagebrush

1617 ~~Coquellia~~ Cymopteris bulbosa A. Nels.
as 1616 scopulorum Cov. (acc. to Blake)
Dr Mathias

1618 ~~Agoseris~~ Crepis (modocensis Greene)
Rocky ground - as 1614

1619 Townsendia sericea Hook.
as 1618

1620 Cryptantha flavoculata (Nels.) Payson
as 1618

1621 Phlox longifolia Nuttall
Sandy soil - - as 1618

1622 Astragalus decumbens (Nutt.) Gray
Sandy soil - as 1618

Wyoming.

1623 Trifolium andinum Nutt.
Rocky hillside near Wyman, Uinta Co. -
el. - 6,500 ft. -

1624 Trifolium andinum Nutt. var.
as 1623

1625 Astragalus spatulatus Sheld. var simplex Tides.
as 1623

1626 astragalus spatulatus Sheld. var. simplex "
as 1623

1627 Eriogonum ovalifolium Nutt.
as 1623

1628 Appleopappus acaulis (Nutt) Gray
Rocky hillside near Wyman - sandy soil
June 10, 1937

1629 Eriogonum caespitosum Nutt.
as 1628

1630 Antennaria arida E. Nels. !
as 1628

1631 antennaria aprica Greene
as 1628

1632 Atriplex Gardneri (Moq.) Standl. var,
under-ground stem often as much as 1 inch
in diameter. as 1628
forming mats in clay soil

1633 Atriplex Gardneri (Moq.) Standl.
forming mats in clay soil - as 1632

1634 Malvastrum - Sphaeralcea coccinea (Pursh) Rydb. subsp. discreta (Nutt.) Kearney
sandy soil - as 1628

1635 Oenothera caespitosa Nutt. var. montana (Nutt.) Munz
Clay soil on hillside near Hyman
June 10, 1937 - fls white

1636 Townsendia strigosa Nutt. det by Blake (incana Nuttall)
as 1635 - sandy soil among rocks
Rays white to pink

1637 Eriogonum salsuginosum Hook.
Chenopodiaceae? as 1636
fls lemon yellow

1638 Lappula Redowskii (Hornem.) Greene var. deserticum (Rydb.) Rydb.?
Clay soil - fls white or bluish

1639 xyloriza — Aster xylorrhiza T. & G.
Clay soil as 1636 - rays white - disc yellow

1640 oryzopsis hymenoides (R. & S.) Ricker
Rocky hillside near Hyman - -

1641 phlox Hoodii Richardson
clay soil - fls white. as 1635

1642 phlox Hoodii Richardson
as 1641 - fls white

1643 Penstemon arenicola A. Nels.
near Blacks Fork River - 3 mi no. of Hyman
June 10, 37 - Sandy soil in a ravine
Fls blue

1644 Commandra pallida A. DC.
as 1643

1645 Cryptanthe caespitosa (Nels.) Payson
Sandy knoll - as 1643
petals white - center white or yellow

1646 Lupinus Greenei A. Nels.
Sandy ravine - near Blacks Fork,
3 mi no. of Lyman - Fls reddish purple

1647 Phlox longifolia Nuttall
among sagebrush & on boulder - as 1646
Fls white to pink

1648 Astragalus confertiflorus Gray
Fls white - clay soil - Bluffs of Blacks
Fork - as 1646

1649 Lithospermum incisum Lehm.
Sandy hillside - fls yellow - as 1646

1650 Astragalus racemosus Pursh
(limestone) shale outcropping - as 1646
fls white. -

1651 Cryptantha sericea (Gray) Payson?
Fls white - inflorescum bracteate, shale
hillside - as 1646

1652 Oxytropis saximontana A. Nels.
as 1646

1653 Physaria didymocarpa (Hook) Gray
as 1646

1654 Crataegus rivularis Nutt Type locality
near Blacks Fork - Tree about 15 ft
high - bark reddish - fls white.

1655 Arabis lignifera A. Nelson
among sagebrush - fls pink - pods
pendulous - plants variable in
size. - as 1646.

1656 arabis pubcarula Nuttall
among sagebrush and Grayia on sandy knolls - near Blacks Fork, 3 miles north of Wyman, Uinta Co., June 10, 1937 - Flrs white, small - stem several - perennial.

1657 arabis Holboellii var. retrofracta
pods strictly reflexed - habitat same as 1655 June 11, 1937 - same cite as 1656

1658 Oenothera caespitosa Nutt. var. marginata (Nutt.) Wood
Sandy ravine - as 1656 · June 11
Flo white to pink - leaves entire or toothed

1659 Astragalus chamaeleuce Gray
Summit of a low rocky knoll, June 11, 1937 - as 1656

1660 Castilleja chromosa A. Nels.
Sandy soil among sagebrush - near junction of Hams. Fork & Blacks Fork - 16 miles so. east of Wyman. Uinta Co., June 11, 1937 -
Flrs carmine.

1661 Oenothera caespitosa Nuttall
sandy soil · flo white · as 1660

1662 Townsendia striigosa Nutt. - det. by Blake (incana Nuttall)
Rocky soil on a knoll - rays pinkish as 1660

1663 Trifolium andinum Nuttall.
Sandy hillside among sagebrush as 1660

Wyo.

1664 Vicia [illegible] (Torr. & G.) [illegible]
Sandy hillside near Blade's Fork
16 mi so. east of Wyman – June 11

1665 Descurainia andreanarium (Ckll.) Payson
among the sagebrush – as 1664

1666 Cogswellia macrocarpa (H. & A.) Jones
= Nomatium macrocarpum (H. & A.) C. & R. fide Mathias
Clay soil – as 1664

1667 Umbelliferae – Cymopterius bulbosa A. Nels.
fide Mathias
Rocky knoll – as 1664

1668 umbelliferae – Cymopterius Fendleri Gray
= C. acaulis (Pursh) Raf. fide Mathias
Rocky knoll – clay soil – as 1664

1669 Trifolium gymnocarpon Nuttall
clay Bank – as 1664.

1670 arabis lignifera A. Nels.
among the sagebrush in sandy soil – pods pendulous – flr pinkish – as 1664

1671 astragalus conzattianus Greene var. divergifolius (Gray) Tidestrom
clay hillside – flr white – as 1664

1672 Astragalus purshii Lough.
Sandy hillside – as 1664

1673 Chaenactis Douglasii (Hook.) H. & A.
loose rocky soil on a talus slope
flr white – as 1664

1674 Chaenactis H. scaposus Rydb. ? ne. to Blakes
Hymenoxys [illegible]
exposed rocky knoll – flr yellow
as 1664

1675 Asclepias cryptoceras Wats.
protected hillside in sandy soil –

1676 Cryptanthia flavoculata (nels.) Payson
Pets white - yellow center - turning white -
among sagebrush - Lonetree - McKinnon
sandy to loamy soil Uinta Co., June 14, 1937

1677 Arabis liginfera A. nelson
Fls pink - pods pendulous - as 1676
steep hillside

1678 penstemon [illegible]
Rocky hillside - fls blue. —

1679 penstemon [illegible]
exposed rocky hillside - fls purple

1680 ~~Cryptanthia~~ Lappula
Fls blue - as 1679

1681 Lesquerella condensata A. Nels.
Exposed rocky knoll — as 1679

1682 Arabidopsis sinuata (Nutt.) Rydb.
among sagebrush - fls small & white
as 1676

1683 Silia spicata Nuttall
Gravelly hill near Henry's Fork - Lonetree -
McKinnon - June 14 - as above 6000 ft

1684 Lesquerella alpina (Nutt) Wats.
as 1683

1685 cryptanthia caespitosa (nels.) Payson
as 1683

1686 Lesquerella alpina (Nutt.) Watson
6000 ft. stems few & consistently so - pedicels more
or less sigmoid. ½ mile east of McKinnon
on a gravelly hill summit - June 14, 1937

1687 Wyo. 6000 ft. *Penstemon acaulis* Wilis. - Type station
Fl. blue to purplish - form tufts 1 in. to 4 across - gravelly hilltop 1/2 mi east of McKinnon, Sweetwater Co., Wyo. - June 14.

1688 Utah *Hesperella* [illegible]
Sandy soil among the sagebrush 2 miles west of Manilla, June 14, '37 5100 ft

1689 *Penstemon* [illegible]
Fl. blue - clumps 6 in. across.

1690 *Penstemon acaulis* - as 1688
as 1688 - 5000 ft. -

1691 *Calochortus Nuttallii* T. & G.
Bulbs for ar. sac too.
18 miles north of Vernal - Uinta Basin. 6,000 ft. 6000 ft. - foot hills of Uinta Mts. - among sage brush on limestone hillside June 14, 1937 - Uintah Co., Utah

1692 *Caulanthus crassicaulis* (Torr.) Wats.
limestone rocks - sagebrush - Juniper area. - as 1691

1693. *Hilia* [illegible]
as 1692

1694 *Chaenactis* [illegible]
as 1692

1695 *Streptanthella longirostris* (Wats.) Rydb.
18 miles southwest of Vernal.
red sandstone silt. - fls white, buds purple - Uintah Co., Utah. - June 15, '37

1696 *phacelia corrugata* A. Nels.
Open atriplex - Tetradymia flat - gravelly soil. - apparently annual - fls purple

8 miles south of Ouray, Uintah Co. - June 15

1697 Chaenactis Stevioides H. & A.
as 1696

1698 Astragalus Geyeri Gray
as 1696 rare

1699 Euphorbia Fendleri T & G.
flattened with roots wedged in a stalky rocks-like material - as 1696

1700 Thelypodium suffrutescens
limy shale of the Green River Eocene - seemingly restricted to a narrow vertical band of exceedingly limy shale - clumps 2 - 6 inches across - root large and with a pithy texture. pods erect slightly flattened parallel to septum but nearly round. eastern slope of Big Pack Mt. - 4 miles west of Willow Creek Uintah Basin, Uintah Co., Utah - June 15, 1937 - alt. 5, 500 ft.

1701 Linum leptopodum A. Nels.
as 1700 - Fls yellow

1702 Actinea acaulis (Hook.) Sund. & Spreng. var. arizonica (Greene) Blake
as 1700 - comp - basal lvs entire

1703 Thelesperma subnudum Gray
as 1700 - basal lvs dwindled - comp -

1704 Silene Polycladon Torr.
as 1900 strigosa Nutt. det. Blake

1705 Townsendia (incana Nutt.)
as 1706

1705a Cryptantha nana (Eastw.) Payson.

utah

1706 Cryptantha flavoculata (Nels.) Payson
stems one to few - as 1700

1707 Cryptantha Grahamii Johnston
stems one to few

1708 physaria [illegible]
as 1700

1709 chaenactis ? Hymenopappus lugens Greene
as 1700

1710 comp. = aplopappus Nuttallii T. + G.
as 1700

1711 Cryptantha nana (Eastw.) Payson
stems numerous - as 1700

1712 Erigeron argentatus Gray
as 1700

1713 Delphinium Geyeri Greene
as 1700

1714 yucca Herrimaniae Treb.
as 1700

1715 Cryptantha Rollinsii Johnston
shale hillside near Willow Creek
Thorner Ranch - June 16, 1937 -

1716 Cryptantha Grahamii Johnston
shale hillside near Willow
Creek - 2 ½ miles south of
Ouray - Uintah Co., Utah - June 16

1717 comp.. 6,000 ft.
as 1716

1718 Stanleya [illegible] ?
Flr yellow - podr arcuate - stems
several to numerous - shale outcrops
Green River Eocene - near willow
creek 2 2 miles south of Ouray
Uintah Co., June 16, '37 - 5,000 ft

1719 Ephedra Torreyana Watson
as 1718 - flr yellow

1720 Mentzelia
as 1718 flr yellow

1721 Brickellia oblongifolia Nutt.
comp var. linifolia (Gt.) Robinson
Flr white · open at nite close in
daytime - pungent odor ..
as 1718 - shrubby - stems numerous

1722 Oplopappus Nuttallii T. & G.,
as 1718 shrubby - stems several to
numerous - some sp. as 1710
var. Greenii (Rydb.)
C. L. Hitchc.

1723 Grindelia [illegible] Nuttall
abundant among the sagebrush
as 1718

1724 Verbena Californica Nuttallii Hook
sandy creek bed - near Willow
creek - 16 miles south of Ouray
June 16, '37 - flr bluish pink

1725 Helianthus petiolaris Nutt. 5,500 ft.
Rocky knoll - as 1724

1726 Silene leptomeria Gray
sandy soil - flr white - as 1724

Utah

1727 Eriogonum inflatum Torr.
Rocky knoll near Willow Creek
16 miles south of Ouray - Uintah Co.
5150 June 16, '37 - Flr yellow - 5,500

1728 Spergularia? [illegible]
steep rocky hillside - rock lost
igneous, 10 miles south of Ouray
Uintah Co., June 16, '37

1729 Malvastrum [illegible] (H.+A.) Rydb. sub sp. pedata (Torr.) Kearney
as 1728

1730 Bahia ambrosioides Blake Composite
as 1728

1731 Sphaeralcea Parvifolia A. Nels.
Atriplex - Tetradenia flat - 8 miles south
of Ouray - June 16.

1732 Hedysarum pauciflorum Pursh
Gravelly bench land - near
Ouray - June 16 - 5,000

1733 Hedysarum gemmalis sp. nov.
Heavy doby soil in a narrow ravine
Stems numerous from a woody base
Flr carmine to bluish - 14 miles
west of Vernal - Uintah Basin June 16
alt 5200 ft.

1734 Cryptantha flava (Nels.) Payson
Sandy soil among the sagebrush
Flr yellow (Golden) - as 1733

1735' Cryptantha flava (Nels.) Payson
Heavy soil in a ravine - as 1733
~~Fls yellow (golden)~~ Fls golden yellow

1736 Cryptantha breviflora (A. Gray) Payson
Heavy limy soil on a hilltop
as 1733

1737 Eriogonum Shockleyi Watson rare
Forming mats 4 to 10 inches across
heavy limy? soil - fls white -
as 1733

1738 Eriogonum ~~Sochi Shockleyi Watson~~ rare. ovalifolium Nutt. var. purpureum (Nutt.) M. Nels.
Fls white - clumps 6 to 10 inches
across - stems numerous.

1739 Cymopterus longipes Watson
Bimbellifer
(Mathias called this C. duchesnensis nr. E. Jones
Clay soil on a hillside
as 1733

1740 Hymenopappus ~~longipes~~ Watson ~~Bimbellifer~~ Compositae
clay hillside - as 1733 - fls yellow

1741 ~~Salvia pinetorum~~ Blake Compositae
disintegrate sandstone - slopes of
a ravine - as 1733 - Stems several per clump.

1742 Silvia congesta Hook. var. Burkeyana (Nels.) Coulter & Rollins
Sandy soil among the sagebrush
as 1733 - fls white.

1743 Astragalus
Fls purplish - sandy soil among the
sagebrush - as 1733

1744 Astragalus convallarius Greene var. decrianfolius (Gray) Tidestrom
fls white - clay hillside - as 1733

Utah

1745 Arenaria capillaris Pair
Dry disintegrated sandstone hillside
Fls white on greenish stems several
14 miles west of Vernal, Uintah Co.,
alt. 5700 ft — June 16 -

1746 Euphorbia philbra (Ckll.) Tidestrom
stems numerous from a woody
caudex - sandy soil among the sage
brush - as 1745

1747 ~~hapsima~~ Psoralea mephitica Wats.
Fls blue - perennial. as 1745
Heavy clay soil -

1748 Arabis pulchra
Fls white - pods pendulous - sandy
soil among the sagebrush on a
low hill - as 1745.

1749 Oryzopsis hymenoides (R.&S) Ricker
Stems numerous — disintegrated sandstone
hillside - as 1745

1750 Oryzopsis hymenoides (R.&S) Ricker
Stems few - spikelets larger than the above
growing in heavy clay - as 1745

1751 Menzelia albicaulis Dougl.
Fls yellow - foothills of the Uinta Mts
growing among the sagebrush. 10
miles no. of Vernal, Uintah Co.,
June 17, '37 - alt 5,700 ft.

1752 Cryptantha Bakeri (Greene) Payson
among the cedars (Junipers)

on a steep slope - heavy soil

1753 Arabis lignifera or A. nelsoni
Steep slope in limy soil - among & under the junipers - pods pendulous - fls pink - as 1751

1754 Cryptantha breviflora (Osterh.) Payson
Sandy knoll - 14 miles north of Vernal - foothills of Uinta Mts - alt. 6000 ft. - June 17, '37.

1755 Wyethia scabra Nutt. composite
as 1754

1756 Astragalus tinctus Punch
fls white - as 1754

1757 Arabis pendulina Greene
among sagebrush + Junipers on the summit of a high knoll - limy rock outcrop - foothills of Uintas - 18 miles north of Vernal - Uintah Co., June 17, '37 alt 6500 ft.

1758 ~~Lesquerella~~ Vesicaria n. sp.
as 1757

1759 Erysimum wheeleri Roth.
Steep slope among cercocarpus 18 miles north of Vernal - alt 7,000

1760 Arabis sparsiflora
Stems simple or branched - fls pink
as 1753

1757a Hedysarum - adobe or heavy clay soil, in the open.

utah

1761 Arabis hirsuta
Steep slope among cercocarpus -
18 miles no. of Vernal - foothills of
Uinta mts; elev. 7,000 ft. June 17, '37

1762 Mimulus guttatus DC.
very Spring in wet sand - 18 mi no.
of Vernal etc. -

1763 Thlaspi glaucum A. Nels -
Uinta Mts. & Vernal - Manila -
30 miles south of Manila in
Ponderosa pine forest floor.
June 12, 1937 - 8,500 ft

1764 Arabis Drummondi
as 1763

1765 Arabis Holboellii var. retrofracta
among the sagebrush - 25 miles
so. of manila - alt. 8,000 ft -
Fls white. pods strictly reflexed

1766 Arabis (hirsuta?)
Mountain meadow in moist ground
Fls white - erect - - as 1765

1767 Arabis ~~spaniflora~~
among ponderosa pine. fls
purplish - pods arcuate - as
1765

1768 Balsamorhiza hirsuta Nutt. (Var. neglecta Sharp)
var. longipedunculata Blake
Rocky hillside among the sagebrush
2 miles south of Sharp Creek -
Uinta Mts. - 10 mi so. of Manila

June 17, '37 - alt. 7,500 ft.

1769 Actinea acaulis (Torr.) A. Nels. (Hieracium acaule Pursh) Spring.

as 1768

1770 Cryptantha flavoculata (Nels.) Payson

as 1768

1771 Delphinium Geyeri Greene

Sandy hillside near Sheep Creek 7 miles south of Manila - stems few to several - June 17, '37 alt 6,000

1772 Cryptantha sericea (Gray) Payson

heavy clay soil near Sheep Creek as 1771 Utah - Daggett Co.

1773 Siaymbrium linifolium Nutt.

Rocky hillside near Hyman, Uinta Co, Wyo - June 21, 1937 - Fls yellow 6,500 ft

1774 Tanacetum nuttallii T. & G.

as 1773

1775 Lesquerella argentea (Pursh) MacM.

exposed knoll in the juniper-limy soil - 1 mile north of Fort Bridger, Uinta Co., June 21, 1937 6,500 ft.

1776 Oxyloxophus acaulis (Nutt.) Gray

Limy shale outcropping - as 1775

1777 Arabis Holboellii var. retrofracta

among sagebrush & on the lee of Juniperus - sandy or limy soil.

as 1775

1778 Stanleya pinnata var. pubescens

Limestone shale hillside - as 1775

1779 penstemon [illegible]
Sandy soil among the sagebrush & Junipers - 1 mile north of Fort Bridger, Uinta Co., June 21, 37 alt 6,500

1780 Streptanthus cordatus Nutt.
Loamy soil among sagebrush & Junipers as 1779

1781 Gilia congesta Hook.
Loamy soil on a hillside as 1779

1782 Pterygia terebinthina (Nutt.) C. & R. var. calcarea (Jones) Mathias
cracks in the sandstone - 15 miles north of Carter, Uinta Co., June 22'37 alt. 6,000 ft.

1783 Streptanthus [illegible]
sandy soil among the Junipers.

1784 arabis liquifera A. Nels.
as 1782
poor spreading - shade of Junipers as 1782

1785 cryptantha caespitosa (Nels.) Payson
heavy soil on an open knoll - as 1782

1786 Gilia congesta Hook.
as 1785

1787 agoseris [illegible]
as 1785

1788 Streptanthella longirostris (Wats.) Rydb.
Very sandy soil among cedars as 1782

1789 arabis Holboellii var. retrofracta
poor strictly reflexed - as 1782 (open)

1790 Draba stenoloba Wedeb. var. nana (Schulz) C.L.H. Wood

alt

1791

a. Nels.

1792 argentea (Pursh) Macm.

16

1794 Wheeleri Rotter.

linearis (Nutt.) Greene

thymiflora (Greene) Payson

1797 a. Nels.

1798 phillara (Skll.) Tidestrom

sandy soil.

1799 Bouqueria intermedia (Wats.) Heller
Rainy hillside - pinon - juniper
10 miles south of Pueblo, Pueblo
Co., alt. 5000 ft. - July 2, 1937

1800 Nycterium pallidum Rydb. -
hillside - pinon - juniper - near
Aguilar - Las Animas Co. - around
6,000 ft - July 2, 1937

1801 Arenaria Fendleri Gray
grassy slope under P. ponderosa
stand several per dmsp. - 7 miles
north of Purgatoire River - 26 miles
no.-west of Trinidad, Las Animas Co.,
July 3, 1937 - alt 7,500 ft.

1802 Scutellaria Brittonii Porter
Sandy soil in open pine woods
as 1801

1803 Anemone globosa Nutt.
Fls white - grassy hollow
as 1801

1804 Draba streptocarpa Gray
Steep moist bank - as 1801

1805 Sisyrinchium angustifolium Miller
along a stream in moist grassy
place

1806 ~~Helianthus sp.~~ Heliopsis scabra Dunal ?
moist swale as 1801 ! Blake

1807 Clematis Hitchcockiana Porter
Grey bank - stem simple or in

clumps - as 1801

1808 thalictrum venulosum Trel.
Stems single - dry hillside
as 1801

1809 Zinnia grandiflora nutt.
see 2016 Calcareous outcrop ~~on~~ pinon hillside
2 miles east of Trinidad, las animas
Co., Colo - July 4, 1937 - elev. 6,500 ft

1810 ~~Actinea~~ acaulis (~~Nutt~~ Pursh) Sprang.
as 1809 fls yellow

1811 ~~Hymenopappus~~ ? filifolius (Hook.) Hook
as 1809 fls yellow - rayless

1812 Euphorbia marginata Pursh
waste ground as 1509
apparently annual.

1813 Calochortus Gunnisonii Wats.
Steep slope among oak brush - 1 mi
so. of Morley - Raton Trinidad - Raton.
las animas Co., Colo - alt 7,500 ft.

1814 Penstemon Brandegei Porter
dry bank - fls purplish - as 1813

1815 Eryngium wheeleri Roth
fls orange - stems simple or branched
above - among the oaks - as 1813

1816 Hesperella montana (Gray) Wats.
Var. suffruticosa Payson
Stems ~~decumbent~~ except young plants
as 1813

1817 Penstemon gracilis Nutt.
Fls pale purplish - as 1813

Colorado

1818 Sisymbrium linarifolium (Nutt.) Payson
Sisymbrium linearifolium
1 mi so of Morley - Las Animas Co., elev. 7,500 ft - among the rocks on a steep hillside - fls pink - July 4, '37

1819 Robinia neo-mexicana Gray
pergatoire River 18 miles northeast of Trinidad, Las Animas Co. elev. 5,500 ft - July 6, 37

1820 Hymenopappus pallidum Nieva
Shrub 1-4 ft - leaves rediate
Heavy clay-like soil - open flat about 20 miles no.-east of Trinidad, Las Animas Co - elev. 5,870 ft. July 6 -

1821 A plopappus [illegible]
3 miles north of Model along abandoned road - Las Animas Co, July 6 - alt 5,500 ft

1822 Stanleya pinnata (Pursh) Britt.
open clay-like heavy soil - 2 mi south of Thatcher, Las Animas, Co. alt. 5400 ft - plants woody at base branched all the way into inflorescence 1-3 ft high - July 6, '37

1823 (Hippia) Tetraneuris linearifolia Torr.
Roadside 2 miles west of Thatcher as 1822

1824 Paronychia diffusa [illegible]
Stony hilltop - Prion - Juniper. area - 6 miles west of Thatcher July 6. - alt 5,500 ft.

1825 Vasquerella Fendleri (Gray) Watts.
abundant as #824 - very conspicuous

1826 Vasquerella ovalifolia Rydb.
rather rare - as 1824 - limestone

1827 Hymenoxys Jamesii T. & G. var. minimoides
protected on rocky hillside by grass
3 miles east of Alcreek, at the
foot of Mesa de Maya, Las Animas
Co., alt. 5,500 ft. - July 7, '37

1828 Ipomaea leptophylla Torr.
Fls pink - as 1827 - stem 1-3 feet long
from a perennial root

1829 Aplopappus spinulosus (Pursh) DC.
open rocky knoll near Alcreek - 3 miles
north of Mesa de Maya - as 1827

1830 Malampodium leucanthum T. & G.
as 1829

1831 Hymenopappus filifolius Hook.
perennial & woody at base - about a bush
1-2 ft high - as 1829

1832 Composite
apparently annual - only plant found

1833 Dyssodia lavendulaefolia T. & G.
Fls yellow 1 to a head, per plant -
generally locally - 8 miles south of Kim,
Las Animas Co., alt 5,000 ft., July 7.

1834 Solidago trinervata Greene!
Sandy soil among oak brush
northern slope of Mesa de Maya,
60 miles east of Trinidad,
Las Animas Co., alt 6,500 ft. -
July 10, 1937

1835 ~~Philadelphus~~ microphyllus Gray?
shrub 3-6 ft high - among
igneous rocks - fls white
as 1834

1836 Ptelea Baldwinii T. & G.
Shrub 2-5 ft high - as
1836

1837 parviflorus Hook. Torr. Cow. Path.
as 1836 ~~Hymenopappus~~ fls ~~red~~

1838 Hymenopappus tenuifolius Pursh!
as 1835 - rayless - fls
white.

1839 Erysimum asperum DC.
among the rocks - as 1835

1840 aristida longiseta Steud.
Tufts among rocks on top of the
mesa - as 1835

1841 (Spiraea) Holodiscus dumosus (Nutt.) Heller
Shrub 4-7 ft high - dry hillside
& canyon bottom among oakbrush
San Francisco Canyon, northern
slope of Raton Mesa, Las Animas Co.,
July 11, 1937 - alt 7,500 ft.

1842 ~~Ribes~~ Physocarpus monogynus (Torr.) Coult.
unarmed shrub 6" - 18" high - dry
bank. - as 1841

1843 Anemone canadensis L.
~~Moist~~ Dry hillside among oak brush at
the head of San Francisco Canyon, No.
slope of Raton Mesa, July 14, '37 - alt. 8,900
Flr white - Was Animas County

1844 ✓ Osmorhiza divaricata Nutt.
=O. obtusa (C. & R.) Fernald - acc. Mathias
Moist bank toward the head of
S. F. canyon - as 1843. - 7,500

1845 Polemonium occidentale Greene
North slope of Raton Mesa near the
top - head of S. F. Canyon - as 1842
Rocky ador - 8000 ft

1846 Aquilegia coerula James
Flr blue - as 1845'

1847 Phacelia heterophylla Pursh
Flr white - as 1845'

1848 Castilleja minata Dougl.
as 1845' - stems several from base

1849 Draba candicans C. L. Hitchc. ined.
Forming ~~tufts~~ mats in crevices of rocks.
Vertical cliffs on north slope of Raton
mesa - as 1845 - flr white.

1850 ~~Phacelia~~ Polemonium neo-mexicana Humb.
annual - flr pinkish - as 1845'

1851 Heuchera versicolor Greene
Rocks crevices in the cliffs on north side of Raton Mesa, head of S. F. Canyon July 11, '37 - Las Animas Co., alt., 8,000 ft. - Fls pink.

1852 Oxytropis pateus (Rydb.) A. Nels.
Grassy hillside on top of Raton Mesa Fls pink - - as 1851 - 8,500 ft. -

1853 Calochortus gunnisoni Watson
dry hillside - north slope of Raton mesa. as 1851 - alt. 8,000 ft.

1854 Robinia neo-mexicana Gray
Fls pink - abundant on the whole north slope of Raton Mesa. - 10 to 20 ft high -

1855 Juncus americanus T. & G.
Stems 4 - 10 ft high - among large boulders Fls white. - as 1854 - near tops.

1856 Physocarpus monogynus (Torr.) Coult.
Small shrub 1 - 3 ft high - fls white. near the top of no. slope of Raton Mesa as 1854

1857 Astragalus racemosus Pursh
open clay-like soil. - near San F. creek - 12 miles east of R. Mesa. - Fls white - July 13, '37 alt. 6,000 ft. - stems numerous from single crown

1858 Asclepias galioides H.B.K.
Heavy volcanic soil - 2 miles south of Frijoli Hill - 12 mi so-east of Trinidad, Las Animas Co., alt. 6,500 ft. July 13, '37 - Fls white - stems erect

1859 Asclepiodora decumbens (Nutt.) Gray
Asclepiodora
Stems decumbent, two to several from an elongate thick root, Fls greenish. Frijoli Hill - 10 mi so-east of Trinidad elev. 6,500 ft. - July 13, 37 Las Animas Co.,

1860 Eriogonum Fendlerianum (Benth.) Small
gregarious, fls white - as 1859

1861 Weaqueralla calcicola n. sp.
Limestone outcropping 3 miles east of S.F. Creek, 8 miles northwest of Trinchera Las Animas Co., alt. 6,800 ft., July 13, 37

1862 Penstemon angustifolius Nutt.
var. caudatus (Heller) Rydb.
Stems several to numerous from a crown
as 1861

1863 Silene spinescens Nuttall
Fls white — as 1861

1864 Hedysarum boreale Nutt.
Fls pink - dry canyon wall - Trinchera Creek near its junction with the Purgatoire River. - About 20 miles northwest of Branson, Las Animas Co., July 14, 1937 - alt 5000 ft.

1865 Cryptanthe thyrsiflora (Greene) Payson
Stems two to several from a
ligneous deep root.- fls white with
yellow center.- as 1864

1866 Symphoricarpos occidentalis Hook.
Shrub 1-3 ft high - [illegible]
Fls white.- as 1864

1867 Chrysothamnus Gnosmodium occidentale Nuttall.
Stems numerous from a large
root - as 1864

1868 Juniperus monosperma (Engelm.) Sarg
Tree or shrub 6 - 15 ft high - scraggled or
hemispherical in shape.- hillsides &
bluffs of the Purgatoire River 1 mile
south of Higbee, Otero County, Colo. -
alt. 4000 ft.- July 19, 1937

1869 Eriogonum tenellum Torr. - rare in Colo.
Rocky crevices near Purgatoire River
8 miles west of Higbee, Otero Co, July
19, 1937, alt. 4,000 ft. Fls white

1870 Petalostemon oreibatis (Nutt.) Torr.
Sandy soil at the head of an arroyo
20 miles northeast of Branson,
Las Animas County. July 14, 1937
Fls white, stems decumbent or
nearly so - alt 4,850 ft.

1871 Eriogonum lachnogynum Torr. subsp. tetrancistra (Small) Stokes
Stems several from a crown, as
1870 - Fls yellow.

1872 Hedeoma Drummondii Benth.
In crevices of rocks at the head of an arroyo, 15 miles south of Timpas, Otero Co. alt. 4,500 ft. July 31, 1937 - Lilac pink.

1873 Pectis angustifolia Torr.
Open sandy soil - 15 miles northeast of La Junta, Otero County, July 24, 1937 Alt. 4000 ft.

1874 Euphorbia novomexicana (K. & S.) Wheeler (E. albicaulis Ryddb.)
as 1873 - Stems decumbent.

1875 Croton texensis (Klotzsch.) Muell. Arg.
as 1873

1876 Euphorbia strictospora Engelm.
as 1873 - Stems more or less erect.

1877 Sphaeralcea angustifolia (Cav.) G. Don. var. cuneata Gray
Irrigation canal banks in open soil. Stems numerous from a thickened deep root, flor orange. - Stems 1 - 3 ft high. 8 miles northwest of Las Animas, Bent County - July 28, '37 alt. 4000

1878 Tamarix gallica L.
Shrub or small tree (willow-like) common - 6 - 15 ft high. - widely distributed along the Arkansas River & its tributaries. Specimens collected near Las Animas on the Arkansas River, Bent Co., Colo., July 28, 37 - 4000 ft

1879 Sporobolus airoides (Torr.) Torr.
Alkaly soil near the Arkansas River
near Brimer, Bent Co, July 28, 1937 - alt 4000

1880 Helianthus pumilus Nuttall
det. A. A. Beetle
Stems numerous from a lignescent root stalk, plants bushy - 1½ - 3 ft high
Granitic gravel on eastern foothills of the Laramie Mountains, 10 miles west of Cheyenne, Laramie County, Wyo.-
alt 7,500 ft. - Aug. 1, 1937

Century for Gray

1881 Polanisia trachysperma
Fls white to pale pink, - Fine creek gravel - as 1880

1882 Cucurbita foetidissima H. B. K.
Wiry trailer - 10 miles south of Las Junta, Otero, County Colo. -
not Buttle
July 16, 1937 - Fls yellow.
4,500

1883 Calochortus gunnisoni wats.
Grassy slope 3 miles north of Estes Park, Rocky Mt. Natl Park, Colo. -
Aug. 4, 1937 - alt. 8,500 ft.

1884 Arabis
Roadside on the eastern slope of Fall River Pass, Rocky Mt. Natl Park
Aug. 4 - alt - 9,200 ft.

1885 Draba lanceolata Royle det. Hitchc.
(Colorado)
Fls white - Summit) Fall River pass -
Rky Mt. Nat. Park - aug. 4, 37 alt 12,000 ft.

1886 Chrysopsis (foliosa Nutt.) ~~resinulosa~~ A. Nels!
det by Blake
Eastern slope) Fall River Pass - roadside
alt. 9,100 ft. Rky Mt. Natl Park. Aug. 4,
37. =

1887 ~~Stanleya?~~ ? [illegible]
eagle rock slope between ~~Red~~ Gypsum
& Edwards Spgs - about 20 miles
~~north~~ east) Edwards Spgs, (White River Nat.
Forest), alt. 8,500 ft -
Aug. 4, 1937. - Eagle County.

1888 Mentzelia multiflora (Nutt.) Gray
Fls yellow - Biennial - open almost
vegetationless hillside - as 1887.

1889 Stanleya pinnata (Pursh) Britt.
Stems 2 - several from a very woody
base - Winy drive between Kremmling
& Wolcott, Eagle Co., Colo. - alt. 7,500 ft -
Aug. 4, 1937

1890 Eriogonum campanulatum Nutt.
Winy outing: - as 1889

1891 Eriogonum deflexum Torr.
Sandy soil on a mesa - 15 miles
northeast) Rock Junction, Mesa Co.
Aug. 5, 1937 - alt. 5000 ft.

Colorado

1892 Castilleja linariaefolia Benth.
Stems several from a perennial tap-root, branched above when eaten off.- in a hot canyon of the Little Book Cliffs, 20 miles northeast of Grand Junction, Mesa Co., Aug. 6, 1937 - alt 5,000

1893 Stanleya integrifolia James
Stems several from a woody base - - - 1892

1894 Arenaria fendleri Watson
Stems numerous from subterranean roots which form dense clumps - stems 1-2 ft high.- Dry ravine in sandy soil.- near base of Pinon Mesa, 15 miles west of Grand Junction, Mesa Co., alt. 5,000 ft.- Aug. 6, 1937

1895 Cryptantha flava (nels.) payson
Stems several from a branched caudex - leaves silvery convergent - calices reflexed in fruit - flowers apparently few per panicle.- near little Dolores Creek 10 miles west of Glade Park, Mesa Co. Aug. 6, 1937 - 7,000 ft.

1896 Lepidium montanum var. alyssoides (Gray) Jones
Fls white - branched from base & near inflorescence - basal lvs pinnatifid among sage brush - as 1895

1897 ~~Eulidesmo petraeoides Britton~~
~~Aplopappus~~ ?
Rocky hillside - pinon - Juniper association.
near the head of a tributary to the Little Dolores
River, 7 miles west of Glade Park, Mesa Co.,
alt. 7,000 ft - aug. 6, 1937

1898 arabis
among pinon & on cliffs - as 1897

1899 Fraxinus anomala Torr.
Small tree (willow-like) 5'-12 ft high -
branching opposite & bark grey & lightly furrowed.
Eastern slope of Pinon Mesa - 7 miles
west of Grand Junction, Mesa Co, alt.
6,500 ft - aug. 6, '37

1900 Psilostrophe ~~tagetina~~ Greene
dry hillside just below Pinon - Juniper
type. near Unaweep Creek, 5 miles
~~southwest~~ of ~~Whitewater~~, Mesa Co.
aug. 7, 1937 - alt. 5,500 ft.

1901 Arabis Holboellii var. retrofracta
Among rocks & ~~cliffs~~ at about 7,500 ft.
northwestern slope of Grand Mesa, 6 miles
south of Mesa, Mesa Co, aug. 7, 1937. -

1902 Aquilegia coerula James
Grand Mesa on a Rocky slope at
11,000 ft. - 4 miles south of Mesa
Lakes, Mesa Co, aug. 5, 1937

1903 Lidaleea candida Gray
Forming a patch, fls white.
Grassy slope - ~~about~~ 5 miles north & mesa laboer, - mesa co., aug. 8, '37
alt. - 9,000 ft.

1904 Eriogonum umbellatum Torr. var. subalpinum (Greene) Jones.
on top of the mesa on a grassy hillside - at 11,000 ft. - 7 miles south & mesa laboer, grand mesa, - Mesa Co. aug. 8, '37.

1905 Eriogonum inflatum Torr.
Fls yellow. - stem inflated - stony perennial granitic gravel on a hillside, 2 miles northwest of Gateway, mesa co., aug. 9, 37
alt. - 4,000 ft. -

1906 Fendlera rupicola Engelm. & Gray
shrub - 4 - 6 ft high - Rocky hillside
as 1905

1907 Baillardia pinnatifida Torr.
Stony knoll - fls usual color. -
near Dolores River, 1 mile south & Gateway, Mesa Co., aug. 9, 37
alt. - 4,000 ft.

1908 Euphorbia Fendleri T. & G.
Stem erect - open fine granitic soil. -
as 1907

1909 Haplopappus pinnata (Pursh) Hirt. ?
Rock knoll - pinon - juniper type
as 1907

1910 Arabis

Under the Pinons. - as 1907

1911 Gilia · ~~congesta Hook. var. Bunleyana (Nels.) Coulter & Rollins~~ crandallii Rydb.

Granitic soil - outwash from a ridge, 2 miles east of Gateway, Mesa Co., alt. 4,000 ft. - Aug. 9, 1937

1912 Gilia congesta Hook var. Bunleyana (Nels.) Coulter & Rollins

Shelley et loc., among sagebrush, granitic soil in a valley bottom, as 1911

1913 Cornus stolonifera Michx.

along West Cr. - 15 miles east of Gateway, alder bark reddish, flowers white, 8 - 15 ft high. - Unaweep Canyon alt. 6,000 ft. Aug. 9, '37

1914 Yucca baccata Torr.

Fruits fleshy & reflexed - fruiting stalk exceeding leaves by less than a foot. Dry hillside - as 1913.

1915 Physalis Fendleri Gray

dry hillside - fls yellowish - as 1913

1916 Eriogonum contortum Small

Saline areas on hillsides & in ravines Atriplex sp. - 6 miles north of Fruita, Mesa Co., Aug. 10, '37 - alt 4,500 fls yellow. -

38 Colorado.

1917 stipulex [illegible] stem
Greasewood flat about 15 miles north of Fruita, Mesa Co., Aug. 10, '37 - alt. 5,000 ft. -

1918 Peraphyllum ramosissimum Nutt.
Steep slope in Oakbrush type, near Plateau Creek - 8 miles northeast of Collbran, Mesa Co., alt 7,500 ft - Aug. 11, 1937

1919 penstemon [illegible]
Stems one or two from a root, Fls purplish - tipped with blue. - Stream overflow among oaks & sagebrush.
as 1918

1920 hapidium montanum var. alypoides (Gray) Jones
perennial, stems numerous from a root, basal & lower cauline ovate-cuneate,
Canyon of Plateau Creek, 15 miles northeast of Palisades, Mesa Co., alt. 5,000. Aug. 11, 1937

1921 Antennaria purpureo-alba Gray
Among sagebrush northeastern edge of the Grand Valley plateau, 20 miles southwest of Whitewater, Mesa Co., Aug. 12, 1937. alt. 6,500 ft. - Fls white

1922 [illegible] Penstemon plateau[illegible]
Corolla purple - as 1921

1923 Eriogonum racemosum Nutt.
Fls white - as 1921

1924 Bahia bicolor (Hook) [illegible]
Fls yellow - stems 1 - more or less [illegible]
Rocks under pines [illegible]
about 2 miles southeast of [illegible]
on 1924 - Alt. 7,200 ft

1925 Solidago nana Nutt.
on 1925

1926 Eriogonum flavum Nutt.
Fls yellow - on 1924

1927 Senecio Fremontii var. pauciflorus Nutt.?
Sandy soil - on 1924

1928 Arctostaphylos pinetorum Parry
Large dense beds 2 - 4 ft high & 10 - 20 meters across, under P. pine
6 miles inside Mesquakie Nat. Forest,
Sweetwater Plateau - 3 miles southeast of White water, Alt. 8,000 ft. on Sandstone rock. - Series beginning to turn red.

1929 Ceanothus cordulatus Kellogg
Trees 10 - 12 feet high & bushes up to 4 miles in diameter under the pines, sparsely leaves & prickly - older bark flaky & [illegible]
on 1924

1930 Arctostaphylos adenotricha Parry
Smaller bushes 10 - 20 ft diameter - 1 - 2 ft high & spreading - border lying to the [illegible] - on 1924

Colorado

1931 Stanleya integrifolia James?
Stems few to several from a root, lower leaves with 2-4 divisions, fls entire, green. - Talus slope) and shale in the Colorado National Monument, about 10 miles southwest of Fruita, Mesa Co., alt. 6,000 ft. Aug. 13, 1937.

[illegible] Spirolepis viridis Coville
[illegible] - stems several from a root,
Chrysothamnus viridiflorus
[illegible] var. elegans
[illegible] Hillside [illegible] Gunnison rocks.
[illegible] 1931

1934 Eriogonum microthecum Nutt. var. rigidum Eastw.
[illegible] - shaded ravine, stems decumbent, fls white. - [illegible] 1931

[illegible] Chrysothamnus californica (Kuntze) Schultz
near the Wind River Nat. Forest Boundary, about 10 miles south of Glade Park, Pinon Mesa, Mesa Co., Colo, alt. 8,000 ft. Aug. 13, '37 - [illegible] - fls greenish or white

1936 Mentzelia pterosperma Eastwood
Shale & coal shale on a north slope 15 miles west of Fruita, Mesa Co., alt. 4,500 ft. Aug. 14, 1931 - Fls yellow -

1937 Viguiera multiflora Nutt. var. nevadensis (A. Nels.) Blake
Root woody, fls yellow - 8-1936

1938 Oxytenia acerosa Nutt. Compositae
Plants 2-3 ft across & high
Stems numerous from a very large perennial root, root on somewhat dry soil, fla sulfur clay-like soil at the foot of steep canyon walls of the Colorado River between Palisades & De Beque, Mesa Co., Aug. 16, 1937

1939 Atriplex Canescens Grandesgia Gray 5,500 ft.
Stems numerous from a gnarled wood base which often exceed 2 inches in diameter, plants 1-2 ft across - growing on clay outcrops on the north slope of bluffs, 8 miles north of Rifle, Garfield Co., Aug. 17, '37 - 6,000 ft.

1940 Atriplex argentea nuttall
annual - growing among sagebrush on a sandy flat, as 1939

1943 Castilleja linariaefolia Benth.
Red sandy soil along a bank - near castle - Glenwood Springs, Colorado River Canyon, Stems several from a base, Aug. 17, '37
alt 5,500 ft. - - Garfield Co

1941 Astragalus vespertinus Sheld.
Fls pink & purplish - stems decumbent. Among sagebrush on a stony slope about 4 miles south of Silt, Garfield Co., Aug. 17, 37 - alt. 6,000

1942 Chrysothamnus linifolius Greene
Shrubs 4-6 ft high - creek bottom
older bark grayish
as 1941

1944 Astragalus pattersonii Gray
Stems numerous from a root - plants
1-2 ft across - Clay - adobe hillside
Prion - Juniper type - 15 miles north
of New Castle, Garfield Co., Aug. 11, '37
alt. 7,000 ft.

1145 Solidago trinervata Greene !
Stoloniferous - stems single or several
from a single root.
Aspen-oak type at 8,500 ft.
25 miles south of Rifle, Garfield Co., Colo.

1146 Chrysothamnus viscidiflorus (Hook) Nutt.
var. lanceolatus (Nutt.)
Shrub 1-3 ft high - [illegible]

1947 Hymenoxys coccinea (Nutt.) Blk. subsp. plata (Rydb.)
[illegible] - alt. 7,000 ft.
30 miles so. Rifle - as 1943

1948 Helianthella uniflora (Nutt.) Torr. & Gray
Stems 1- several - lvs + stems scaberous, rays
yellow, disk purple.
Limy shale among Prion - Juniper, 15 miles
south of Delta, Montrose Co., alt. 6,000 ft.
Aug 21, '37

1949 Senecio amplexifolius Rydb.
Dry hillside among oak-brush - at the
head of Stevens Gulch - 10 miles north
of Paonia, Delta Co., alt. 8,000 ft. - Aug. 23

1950 Chrysothamnus parryi (Gray) Greene
Shrub 2-3 ft high, bark sandy colored -
leaves not twisted - as 1949 - Dry open area

1951 Vaccinium myrtillus var. spathulatum (Robinson) C.L.W. Hitchc.
Stems several to numerous from a branching woody base - old leaves entire - basal leaves often forming a clump, up to 1½ feet across.
Rocky hillside among sagebrush - 1 mile south of Paonia, Delta Co., alt. 6,500 ft. aug. 23, 1937

1952 Chrysothamnus nauseosus Nutt.
var. graveolens (Nutt.) Hall
Shrubs 3-6 ft high - bushy - lower bark sandy colored - upper branches white.
Creek bottom, Minnesota Creek, 3 miles south of Paonia, Delta Co., alt. 6,000 aug. 23. '37

1953 Scirpus paludosus A. Nels.
Growing in clay doby soil in the bottom of a stream bed, roots submerged by 1 to 2 inches - 2 miles south of Hotchkiss, South Fk Gunnison R., Delta Co., alt. 5,000 ft. - Aug 23

1954 Crataegus
Muddy Creek Gunnison R., about 20 miles N.E. of Somerset.
Gunnison Co., Colo., aug. 24, '37 - alt. 7000 ft.

1955 Rosa sp. near woodsii
as 1954

1956 Clematis ligusticifolia Nuttall
Leaflets nearly all entire, climbing over Populus - stems 20-40 ft long. - Fls white
near North Fork of Gunnison R. - 1 mile west of Somerset, Gunnison Co, alt. 6,000 ft. Aug. 24,

1957 Oxytropis stricta (Torr.) Rydb.
Wet alkali soil - 10 miles west of Hotchkiss, Delta Co., aug-24, 37 - alt. 5,000 ft.

1958 rust on Aneulandria affecting fruits mostly -
Rocky hillside 3 miles northeast of Cedaredge, Delta Co., aug. 25, '37

1959 Salix lutea Nuttall var.
Tree 15 ft high with numerous to few canes from base - near Iron Creek. 10 miles south of Crawford, Montrose Co., Colo. alt. 6,500 - aug. 26, '37

1960 Salix subcoerulea piper
Tree 10-15 ft with numerous canes from base - bar young buds yellowish. as 1959.

1961 Eriogonum salicinum Greene
Stems several from a very woody caudex Flr white. - Among sagebrush on poison mesa, 10 miles southwest of Crawford, Montrose Co., alt. 6,000 - aug. 26

1961a = E. simpsonii Rattle. Date as 1964

1962 Eriogonum flavum Nutt.
Forming mats 6"-1' across on sandstone rocks - Flr yellow. - Black Canyon of the Gunnison River, 15 miles southwest of Crawford, alt. 6,500 ft. aug. 26, Montrose Co. -

1963 Corydalis aurea Willd.
Sandy bank - Flr yellow - stems many from a

Grass - clumps 1 foot or more across:
as 1962

1907 1907 Tetradymia canescens DC. composite
Shrub - 1 ft high - Rocky hillside near
Smith's Fork, 6 miles east of Crawford,
Delta Co., Colorado, alt. 6,500 ft - aug. 24

1965 1965 Berberis Fremontii Torr.
Shrub 4 - 6 ft. high, berries red in
bunches, three etc. on single. - Foliage bluish
as 1904 4 miles east of Crawford

1966 Litbago occidentalis (nutt.) T.+H. composite
Stems single from an underground
rootstalk, - clay - stony saline soil along
a litchbank with lanceolate et. l.
10 miles southeast of Delta, Delta Co., alt.
5700 ft. aug. 27.

✓ 1967 Chrysothamnus nauseosus Nutt.
Shrubs 4 - 6 ft high in hemispherical
bushes - stems numerous from base -
older bark gray & fissured - new growth
dull whitish - clay soil in ravines,
10 miles south east of Delta in
Montrose Co., aug. 27. - alt. 5000 ft

1968 Glossopetalon nevadense Eaton
Shrub less than 1 foot high - highly branched
older bark gray. - Rocky hilltops
near the Gunnison R. - 8 miles
west of Delta, Delta Co., alt. 5,000 - aug. 27

1969 Bahia radicans (Gray) Cronq. Composite
clay ravines & canyons; fls yellow
stems 1–2 ft annual – as 1968
near Unicon R. & mi west of Delta,
Delta Co., alt. 5000 ft. aug. 27.

1970 Psilostrophe Bakeri Greene
Ravines usually in sandy soil
very rare – as 1969

1972 (1972) Actinea septentrionalis
Jeps. incana (Gray) Cronq. Composite
Clay – sand hillside. stems few from
woody base – as 1967

1971 (1971) Hillardia Hillardia pumila Torr.
stems annual from a rhiz. – as 1969

1973 Xanthisma lavandulaefolia T. & G.
root is var. grandulosa Cronq.
Fls lemon yellow – turning reddish with
age – as 1967

1974 Hillardia Hillardia glutinosa Nutt.
Spreng. var. bifolia (D.C. Eat.) Robins. Composite
Shrubby forming bushes 1 ft or more
in diam. hemispherical – highly branched
Glen Park area.

1975 Xanthisma Texanum var. Watsonii
Clay – sandy hillsides near Unicon
River, 6 miles west of Delta. also
Delta – as 1967

1976 Gaillardia aristata (Pursh) Annual
stems hispid – as 1975

1977 ° Eurybia melanocarpa Bray
shrub 1-2 ft high under sprubs + aspen
& in open; uncompahgre plateau, 30 miles
southwest of montrose, montrose Co., alt
9,500 ft. aug. 28.

1978 Thermopsis montana nuttall
perennial from subsurface roots, forming
a rather large population over the
area under aspens. as 1977

1979 ° arabis drummondii
as 1977

1980 Atriplex canescens (pursh) nutt,
shrub 2-4 ft high - sagebrush -
pinon-juniper. 20 miles west, 25 miles
south of delta, montrose co., alt. 7,200
aug. 28.

1981 artemisia tridentata Nutt.
shrub 1-1½ feet high growing with
A. nova under pinon-juniper.-
sandy soil - 8 miles west of montrose,
montrose co., alt 6,500 - aug. 31

1982 ° Silene ~~montana Rydb~~ congesta Hooker. var Burleyana (Nels.) Cov. + Kell.
sandstone rocks in outwash material,
sandy soil of a steep slope, pinon-juniper
near Bostwick park, 8 miles east
of montrose, montrose co, alt. 7,000
aug. 31, '37

Colo.

1983 ° plugeria floribunda Rydb.
as 1982

1984 ° Arabis
as 1982

1985 ° chrysothamnus viscidiflorus (Hook.) Nutt.
Shrub 6" - 2 ft high - older bark grey
Sandy soil among sagebrush, 10 miles
south east of montrose, montrose Co.,
alt. 7000 ft - aug. 31

1 1/2 ° chrysothamnus Tetradymia canescens D.C.
Bush 1 ft. high - intricately branched
as 1985

1987 chrysothamnus viscidiflorus (Hook.) Nutt.
less than a foot high - base woody, intricately
among sagebrush on a dry hillside - 4 miles
north of Ridgeway, ouray co., alt. 7,500 ft.
Sept. 1, 1937

1988 Stanleya pinnata (pursh) Britt.?
clay - dobey soil among pinon-Juniper.
Stems few to numerous from a root - leaves
mostly all divided - 10 miles northeast of
Ridgeway, ouray co. - alt. 7,500 ft.
Sept. 1, 1937

1989 cirsium undulatum - (Nutt.) Spreng.
intricately branched all the way up. -
2 - 3 ft high. - near the Cimarron
River among sagebrush on a steep slope
6 miles south of Cimarron, montrose
Co., alt. 8,000 ft. - Sept. 2, 1937.

1990 Astragalus Nichalcor Tidestrom
Stems numerous from base, 1½ - 3 ft high, forming hemispherical clumps 2 ft or more. - Fls white - - Clay - shale hillside, Filgate Mesa - 2 miles east of Hillside, Gunnison Co., Alt. 8,500 ft. - Sept. 2, 1937

1991 Salix ligulifolia Ball.
Tree forming a clump - 15 ft high - older bark gray - [illegible] - as 1990

1992 [illegible] tenuifolia Nutt.
Bark dark - Tree (clump form) 20 ft high - 2 miles east of Cerro Summit, Gunnison Co., Sept. 2, '37 - Alt. 8,500 ft.

1993 Salix monticola Bebb.
Small tree about 10 - 15 ft high - [illegible] only a few - older bark reddish.
as 1992

1994 Salix Scouleriana Barratt.
Family pistillate tree - 15 - 20 ft high - older bark grayish, - as 1992

1995° ~~Polemonium~~ Loeselia pentastemonoides (Jones) Cov.
Crack of granite cliff, 6 miles southwest of Sapinero, Blue mesa, Gunnison Co. alt. 8,500 ft. Sept. 3, 1937

1996 Frasera speciosa Hook.
Cauline leaves whorled, inflorescence branches whorled, Flowering nearly full length - 3 - 4 ft high, Blue mesa 10 miles southwest of Sapinero, alt. 9,000 ft - Sept. 3, '37 Gunnison Co.

1997 Salix Scouleriana Barratt.

Tree - 15'-20 ft. high - several cauled to tree but not a clump - trunk 2 in. in diam. - under the aspens - as 1996

1998 Juniperus communis L. var montana Ait.
low large fan-like whorls - stems recumbent except at ends. - 2-3 ft high. under the aspens - as 1996

1999 ✓ Artemisia cana Pursh

High mesa - 10 miles south of Lapinero Gunnison Co., Sept. 3, 1931 - alt. 9,000 ft. shrubs 1½ feet high - on the mesa A. nova in size + habit.

2000 Lupinus montanus Nutt.
stems one to several from a perennial root, basal leaves lightly pubescent.
among sagebrush on gravel - high mesa 10 miles south of Lapinero etc. as 1997

2001 Lupinus argentatus
sandy soil among rocks + sagebrush near the Gunnison River, 3 miles west of Lapinero, Gunnison Co., alt. 7,500 Sept. 4, 1937

2002 Lupinus
stems erect from the basal rosette of leaves
Exposed hillside in granite soil.
The chief associate - Artemisia frigida + the annual - 5 miles south of Iola, Gunnison Co., Colo. 8,500 ft. - Sept. 4, 1937.

2003 Corydalis Brandegei Watson
Pes juliste with purple beak.
Stems several to numerous from a succulent tuberous root system, stems hollow, very succulent up to 2 in. in diameter at base - 3 - 5 ft high, open slopes in an association with grasses & forbes — near Lake [redacted], Brennan at the base of Ruby Peak - 10 miles west of Crested Butte. Gunnison Co., alt. 10,500 ft - Sept. 6, 1937

2004 Descurainia Hartwegiana (Fourn.) Britt.
stems single, leaves not finely dissected 1 ft to 4 ft high. - fertile hillside near fir trees. - as 2003 -

2005 Delphinium [illegible] - (Type 1) a. sp.
stems single or several from a root. 2 - 3 ft high - as 2003

2006 Salix planifolia Pursh var.
Forming dense growth in patches in a creek bottom, stems more or less decumbant — older bark ashy grey - new dark red. - 3 - 5 ft high.
8 miles west of Crested Butte, Gunnison Co., Sept. 6, - alt. 10,000

2007 Salix pseudo-monticola Ball
small tree 6 - 12 ft. high forming dense patches in creek bottom - old bark ash-grey - young reddish. Stems more or less decumbant. -
as 2006

2008 Salix Wolfii Bebb.
low shrub 1-3 ft high forming a dense growth over the creek bottom ½ miles west of Crested Butte, Gunnison Co.; alt. 10,000 ft Sept. 6, 1937

2009 Crataegus n. sp.
Tree 7 few cases with red bark - 10 ft. high - 8 miles south of Iola along a creek, Gunnison Co. alt. 8,000 ft Sept. 7, 1937

2010 Eriogonum cernuum Nutt.
near cebolla creek.
annual - growing in tufts among sagebrush on a rocky hillside - 10 miles south of Powderhorn, Gunnison Co., Sept. 7, 1937. - 8,000 ft.

2011 Chrysothamnus depressus Nutt.
low with woody rot - among sagebrush. 8 miles south of Gunnison, Gunnison Co., Sept. 7, 1937 - alt. 8,000 ft.

2012 Allium cernuum Roth.
Rocky exposed hillside - several plants together - as 2011

✓
2013 Crataegus saligna Greene
along Antelope creek about 5 miles north west of Gunnison, Tree 10-15' ft high. bark gray. - Gunnison Co. Sept. 8, 1937 - alt. 7,500

2014 arabis

~~Stems several from base - sterile basal portions often elevated - Forby expand to all 4 sides with 7 Trinidad, 1 - about 10 miles southeast of Duchesne, Duchesne Co. alt. 5,000 ft. - Sept 5, 1937~~

2015 monolepis nuttalliana (adults) Fam. Chenopodiaceae
clay soil near Wyman, Uinta Co., June 10, 1937 - alt. 6,500 ft.

2016 artiper canis (Pursh) Savory.
This is no 1810. Calcareous outcrop on piñon hillside 2 miles east of Trinidad, Las Animas county, July 4, 1937. elev. 6,500 ft.

2017
Dry knoll near Blacks Fork River, 3 miles no. of Wyman, Uinta Co., June 10, 1937 - alt. 6,500

2018 or 1724 Nama aretoides (H. & A.) Brand
Sandy dry creek bed, near Willow Creek, 16 miles south of Ouray Uintah County, June 16, 1937
5,500 ft.
det. C. L. Hitchcock

Cols.

2019 Arabis Cranbellii
among sagebrush, 12 miles south of Ida, [illegible] Co., Sept. 7, 1938
alt. 8,000 ft.

2020 Arabis Fendleri (Wats.) Greene
under P. ponderosa, 2 miles west of Powderhorn
Gunnison Co., Sept. 7, 1938 "

2021 Viola septentrionalis Greene
dry hillside, South Royalton - Sharon, Green Mts., Windsor county, Vermont, May 1, 1938
with chasmogamous
F. S.

2022 Saxifraga virginiensis
exposed cliffs in dry soil, So. Royalton - Sharon, Green Mts., May 1, '38, Windsor Co., Vt.

2023 Viola blanda Willd.
[illegible] moist hillside, South Royalton - Sharon, Windsor County, Vt. May 1, '38

2024 Hemitonia conadea L.
moist hillside, South Royalton - Sharon, Windsor Co., Vt. May 1, '38

2025 Erythronium albidum L.
moist alluvial bed, Chester - Ludlow, Windsor Co., April 30, 1938, Vermont

2026 Viola canadensis (Goldie) Walp.
woods, Chester - Ludlow, Windsor Co., April 30, 1938, Vt.

2027 Trillium erectum L.
Moist woods, Chester - Ludlow, Windsor Co., Vt., April 30, 1938

2028 Sanguinaria canadensis L.
Moist woodside, East Stafford, Orange Co., Vt., May 1, 1938

2029 Lonicera canadensis Bartr.
Rocky cliffs, Huntington, Middlesex Co., Mass.
May 4, 1938.

2030 Aquilegia canadensis L.
as 2029

2031 Carex plantaginea Lam.
+ C.A. Weatherby
Moist rum, Granville, Hampden Co., Mass., May 8, 1938

2032 anemone quinquefolia L.
woods, Huntington, Hampshire Co., Mass.
May 8, 1938.

2033 Tiarella cordifolia L.
as 2032

2034 Dentaria diphylla Michx
moist woods, Berkshire Hills, Granville Hampshire Co., May 8, 1938

2035 Mitella diphylla L.
as 2034

2036 prunus cuneata
Killingly, Windham Co, Conn., May 7, 1938

2037 Viola pedata L.
Dry hill, East Granby, Hartford Co., Conn.
May 8, 1938 - Rollins & Weatherby

2038 Anemonella thalictroides (L.) Spach.
Rich woods, East Granby, Hartford Co., Conn.
May 8th
